Experience

CYZEN AI | *Founding AI & Security Systems Engineer* March 2026 – June 2026
• **Tech Stack:** Python · LightGBM · LLaMA 3.3 70B · Groq LPUs · Supabase · PostgreSQL · React *Bangalore, Karnataka*

- Architected and shipped a 6-in-1 AI cybersecurity defense platform combining machine learning classification with automated incident crisis triage.
- Researched and trained an ML threat detector using **LightGBM** on **164,972 real emails**, achieving **98.31% accuracy** and reducing false-positive alerts by **42%** via lexical and structural feature engineering.
- Built an automated incident response pipeline integrating **LLaMA 3.3 70B via Groq LPUs**, achieving **<180ms Time-To-First-Token (TTFT)** to generate real-time playbooks and mitigation strategies.

SI Digital Solutions | *Founding AI Product & Software Engineer* December 2025 – Present
• **Tech Stack:** React · TypeScript · Node.js · AI Agent Workflows · RESTful APIs · Tailwind CSS *Bangalore, Karnataka*

- Architected and deployed custom digital systems, responsive web platforms, and autonomous AI agent workflows for enterprise and SME clients.
- Engineered end-to-end digital ordering and catalog management systems for 2 hospitality enterprises, digitizing inventory workflows, eliminating manual menu updates, and accelerating order fulfillment.
- Built high-performance, mobile-first interfaces with React, TypeScript, and Node.js with real-time state management, achieving sub-second page loads.

Viksit Gram | *AI Product & Software Developer* August 2026 – Present
• **Tech Stack:** React · Python · Data Analytics · Telemetry Dashboards · RESTful APIs *Bangalore, Karnataka*

- Engineered centralized digital governance dashboards and data analytics pipelines for rural development and civic monitoring.
- Built analytical telemetry modules to track public resource allocation, welfare program velocity, and developmental metrics, delivering automated data insights for civic administration stakeholders.

Education

Chanakya University, Bangalore 2023 – 2027
Bachelor of Computer Applications (Honours) — Data Science Major, Cybersecurity Minor ***8.60/10 CGPA***

SLES Pre-University College, Bangalore 2021 – 2023
Pre-University Examination (XII) — PCMCs (Physics, Chemistry, Math, Computer Science) ***84.00%***

St. Michael's English High School, Bangalore 2020 – 2021
Secondary School Leaving Certificate (X) — Karnataka State Board ***First Class***

Projects

Security Header & Web Posture Inspector | *Python, OWASP Baselines, AST Security Parsers, REST APIs* March 2026 – April 2026

- Constructed an automated scanner evaluating HTTP headers against **OWASP Top 10** baselines; built an AST parser to analyze CSP policies and detect wildcard injections, unsafe scripts, and TLS downgrade vectors.

PulseBLR Urban Route Engine | *Multi-Agent LLM, Python, Node.js, Express, TypeScript* April 2026 – May 2026

- Architected an autonomous **5-agent LLM consensus pipeline** analyzing real-time traffic signals and transit telemetry; implemented self-verification consensus, eliminating route hallucinations by **94%**.

MovieBuddy Recommendation Engine | *Python, Scikit-learn, TF-IDF, Cosine Similarity, React* May 2026 – June 2026

- Developed a personalized recommendation system over 10,000+ movie records; optimized sparse matrix dot-product operations, accelerating inference throughput by **3.2x**.

Skills & Courses

Programming Languages & Frameworks: Python, C, C++, Java, SQL, TypeScript, JavaScript, HTML, CSS, React

AI-Powered Security & Cyber Defense: Autonomous Threat Detection Agents, SOC Log Monitoring, TryHackMe (Hands-on Labs), OWASP Top 10 Hardening, IAM & Web Posture (CSP/HSTS), Burp Suite, Nmap, Network Protocols

AI Product Engineering & Distributed Systems: Multi-Agent Orchestration, LLM Evaluation & Benchmarking, Latency Optimization (TTFT), LightGBM, Scikit-learn, LLaMA 3.3 70B, Groq LPUs, Prompt Engineering, NLP, PyTorch

Software Development & Cloud Systems: RESTful APIs, Full-Stack Development, OOPs, Data Structures & Algorithms, Node.js, Express, PostgreSQL, Supabase, Git, CI/CD, Unix/Linux, Windows

Certifications & Training: Applied Cybersecurity & SOC Operations , Excellence in Machine Learning & Data Science , Data Structures & Algorithms

Achievements

- **Won 2nd Place Overall — GeeksforGeeks Hackfest, Bangalore** — Awarded Rs. 15,000 cash prize among 100+ competing teams
- **Ticket to Grand Finale — GeeksforGeeks Hackfest** — Qualified directly based on multi-agent AI system architecture
- **1st Place in Prompt to Product (OJAS 2K26)** — Built production generative AI platform; won Championship Trophy
- **2nd Place in Web & App Development (OJAS 2K26)** — Recognized for UX/UI execution and clean system architecture
- **8.60 CGPA in BCA (Hons) & 84% in 12th (PCMCs)** — Demonstrating consistent academic and technical discipline
